

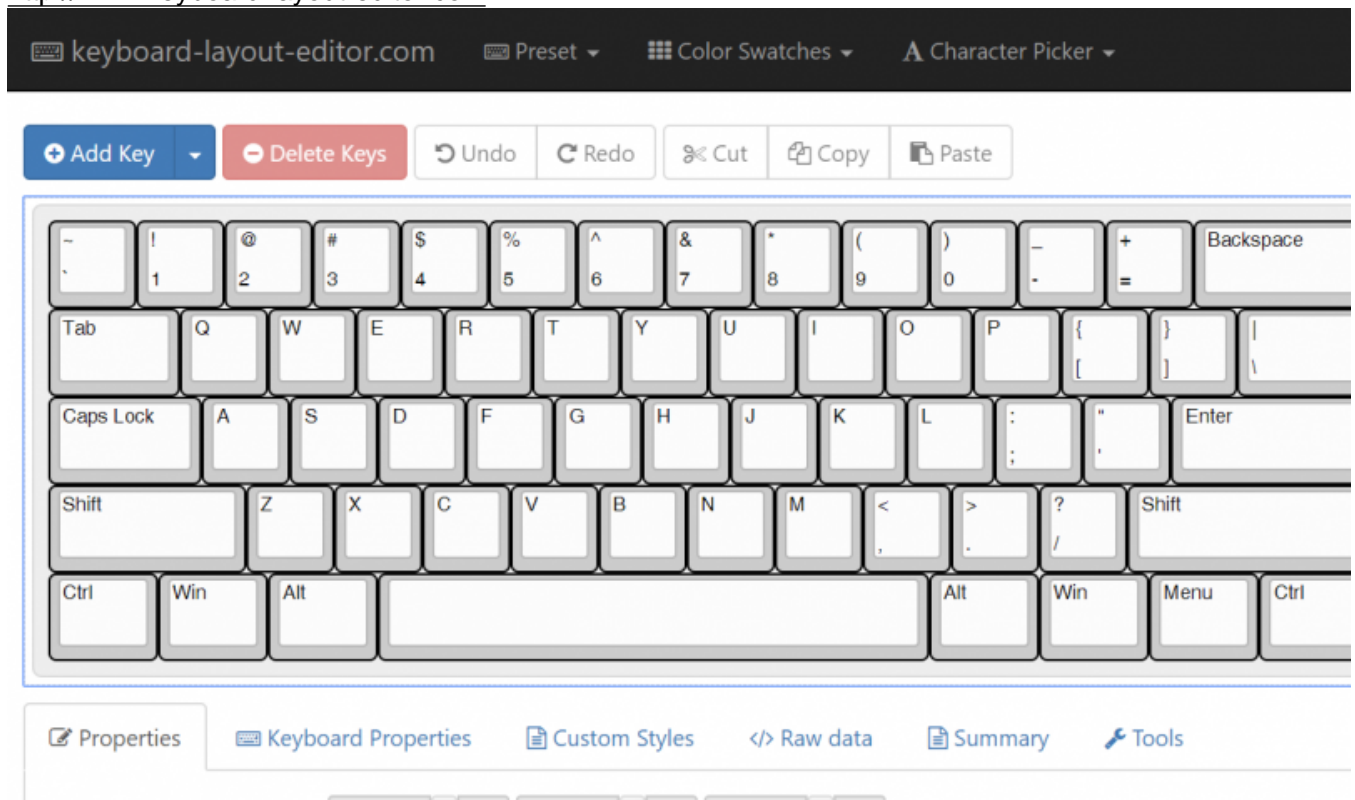

Plate with ai03 Plate Generator

A quick and easy method that doesn't compromise.

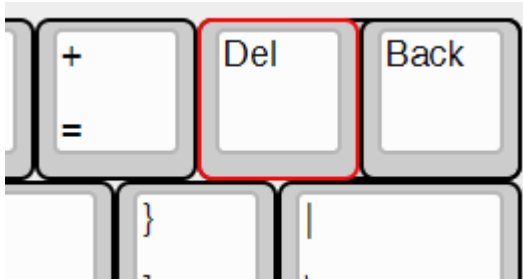

Tutorial

1. Begin by making the layout in Keyboard Layout Editor.

<http://www.keyboard-layout-editor.com>

If you need compatibility cutouts, overlay the various options.

2. Copy the info from the Raw Data tab into the KLE Data field at ai03 Plate Generator.

<https://kbplate.ai03.com/>

3. Select the switch cutout types, stabilizer types, fillet radii, etc.
4. Press the "Download DXF" button to download the plate.

5. Tune to perfection using a CAD program of your choice. Enjoy!
